DETAILED ACTION

Priority

Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). Based on previously granted patents claiming foreign priority, it is believed that the certified copies of the Danish priority documents have been filed in one of the earlier filed applications. It is requested that Applicant indicate in which application the priority papers were filed. Applicant's claim for the benefit of a prior-filed application under 35 U.S.C. 119(e) or under 35 U.S.C. 120, 121, or 365(c) is acknowledged. The instant application claims benefit to PCT/DK83/00118 filed 09 December 1983. Applicant should note that if the instant application issued as a patent, there would be no patent term remaining as the term expired 09 December 2003.

Information Disclosure Statement

Applicant should note that as of the mailing date of the instant Office action, no information disclosure statement had been received for this application.

Specification

The application is objected to because of alterations which have not been initialed and/or dated as is required by 37 CFR 1.52(c). A properly executed oath or declaration which complies with 37 CFR 1.67(a) and identifies the application by application number and filing date is required.

It would appear that the copy of the specification, claims and abstract which were submitted to the PTO at the time of filing the application were an older copy of the application from another filing. There are marks indicating amendments having been made, but there are no pages to indicate what the amendments are. When filing a continuation of a previously filed application, the application is copied, but none of the amendments made during the prosecution of the parent case are carried over into the child case.

It is suggested that a substitute specification be provided which contains clear text and any amendments that Applicant feels are necessary. The claims that are being examined are the ones that were originally filed in 08/953,217 with no alterations.

Claim Rejections - 35 USC § 112

Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements and/or steps, such omission amounting to a gap between the elements and/or steps. See MPEP § 2172.01. The omitted elements/steps are: the claims require a "biosynthetically formed" protein which the disclosure teaches is achieved by the expression of the fusion protein in a host cell that comprises DNA encoding for the fusion protein. However, the instant claims fail to include the element of a host cell that comprises a DNA encoding for the protein as well as failing to include a method step that would produce the protein. These appear to be critical steps/elements for the practice of the claimed invention.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-3 are rejected under the judicially created doctrine of double patenting over claims 1-44 of U. S. Patent No. 5,691,169 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: a process for preparing proteins using an N-terminal extension fused to the protein of interest, cleaving the extension with DAP I, and recovering the protein produced. The wording of the instant claims are not identical to the claims of the issued patent, however, the same subject matter is being claimed with the same critical limitations; therefore, the instant claims would improperly extend the "right to exclude" already granted in the patent.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of

Art Unit: 1647

the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.
